

VISION

In five years, every production facility is using data as the driver for forward momentum. Resulting in a leaner, meaner, more agile organization that can pivot when appropriate to maximize both its internal resources and external opportunities

SERVICES

Malamute will help you with every step in the data process. Starting with collecting your data safely to our certified Microsoft solutions. By combining your data sources in Power BI, you will have dynamic insights which give great input and opportunities to further optimize your processes with CI and TPM.
